

Self evaluation of GLODE GLODE360 Spring 2018

The course as such went well; as planned we held 4 master seminars where students presented their work. Several students were, for various reasons, delayed in their writing process, and individual meetings were held with each student and his/her supervisor, to follow up and ensure progress. Not all students managed to hand in their thesis in the spring semester, but eventually, and with good follow up from staff members of GLODE, all of them managed to complete their degree.
