Project report (group)

Written exam (individual)

### Oppfølging fra tidligere evalueringer / Follow up from previous evaluations

The course is continuously being improved within the team of teachers.

<b>Evalueringemetode(er) / Form of evaluation</b>	written feedback
---	------------------

### Sammendrag av studentene sin evaluering / Summarize the results from the student evaluation

The correspondence between the textbook content and the lectures could be further improved.

Some students appreciate the element of research in the teaching. Other student want to see exactly the textbook material lectured, and less research-oriented lectures.

### Emneansvarligs evaluering / The course coordinator's evaluation

The course is on good track.

It would be desirable if more of the students also come to the lecture. From approx. 140 students, mostly 20-40 students come to the lecture. This is not satisfying.

### Mål for neste evalueringsperiode - forbedringstiltak? / Goals for the next evaluation period - what can be improved?

Better correspondence between textbook and lectures.

Adjust the research-oriented content of the course to the expectations of the students.
