Sammendrag av studentene sin evaluering / Summarize the results from the student evaluation
There were only 8 students who participated in the evaluation out of 151. This makes it impossible to generalize the results of the evaluation. However, overall, the course was evaluated as relevant, of reasonable difficulty, and satisfactory.

Emneansvarligs evaluering / The course coordinator's evalutaion
The only significant problem with the course was the unfortunate placement of lectures in the timetable (8.00 am). Since lectures are not mandatory, many students decided to skip them (there were normally 30–40 students present at the lectures, out of 151). This also made it hard organizing any guest lectures in the course.
