What was good/useful with the lectures, and what can be improved in the future?
(please write in English or Norwegian)

På kursbeskrivelsen står det at dette kurset skulle omhandle bekreftende faktoranalyse i tillegg til eksplorerende faktoranalyse, det gjorde det ikke. Jeg synes også at dette kurset var for grunnleggende, og fikk ikke noe utbytte av å delta på kurset. Gruppestørrelsen for presentasjonene var også for stor, kanskje kunne en heller hatt grupper a 3 personer, og trukket om hvilke grupper som skulle presentere?

I liked the really good and clear explanation.

The topics in the lectures are in accordance with recommended literature

Do you feel that the course could be improved in organisation, and if so, which part? (please write in English or Norwegian)

Det var veldig ok med intensivkurs i dette faget. Det eneste jeg har å utsette på organiseringen var at forelesningsøktene varte i godt over en time istedet for 45 min. Dette ble litt uvant for en del av oss studenter.

I wish it was longer than 1 week, so that we could get more practice in the actual calculation of factor analysis and not just the underlying ideas. Overall a very good course, though it could have been 1 week longer. I understand this would complicate things since the professor flew in for the occasion.

Gruppene kunne blitt inndelt i forkant av kurset, slik at en ikke måtte komme på forelesningene (som ikke var obligatoriske) av den grunn.

Do you feel that the course could be improved in organisation, and if so, which part? (please write in English or Norwegian)

perhaps the lectures could be done in two instead of one week, so that we would be able to better absorb the knowledge

If you have any other comments or suggestions please write it in the box below (write in English or Norwegian)

In general I feel I have learned a lot, the teaching was good, and the course was fun and interesting. It could maybe have been made clearer that there exist different types of factor analysis for different purposes (ex. exploratory vs confirmatory) It would also have been nice if the lecturer could have informed the class at the start of every lecture about the plan for the day, including when the breaks are. It is OK to have breaks at different times than usual, but then it is good to know about it in advance.

Good!
