

Emnerapport (2013/høst)

Emnekode og navn: DASP 304, Språkteknologiske bruksområde

Faglærers vurdering av gjennomføring

Praktisk gjennomføring:

Kurset gikk veldig bra, siden alle studentene var engasjerte. De hadde ingen vanskeligheter med å følge kurset selv om læringskurven var veldig bratt.

Strykprosent og frafall:

Alle studentene avsluttet og besto kurset.

Karakterfordeling:

De individuelle prosjektene som ble innlevert på slutten av semesteret overgikk alle forventninger. Alle de tre studentene fortjente en A.

Studieinformasjon:

Jeg var tilstrekkelig informert.

Tilgang til relevant litteratur:

Ikke noe problem.

Faglærers vurdering av rammevilkårene

Lokaler og undervisningsutstyr:

Rommet var tilstrekkelig utstyrt.

Andre forhold:

Faglærers kommentar til student-evalueringen(e)

Metode – gjennomføring: (Her kommer oppsummering fra studentevalueringen.)

Evalueringen ble gjennomført i den siste undervisningstimen i semesteret. Misidevalueringssystemet ble brukt.

Her er resultatene:

14.11.13

Evaluation: Responses

- #14 Overall grade for this course: (choice)

A: 3

- #15 Aspects I liked about the course: (text)

2013-11-13 X: A good balance between basics and advanced material given the different skill sets of the students.

2013-11-13 X: I like all I've learnt during the challenges I've faced with programming, as well as the guidance the lecturer gave, both during the teaching and for my writing of the term paper. Homework and solving tasks during class was helpful. The lecturer taught Perl at a good speed. Certainly the most challenging, but most fun course this semester!

2013-11-13 X: Even if I didn't know much about programming I was able to follow this course. I learnt a lot, since the course started at the basics. The course was also very informative, interesting and useful. The lecturer was thorough and precise in what he covered in class. He also gave us a lot of examples and exercises, which was fun.

- #16 Aspects that need improvement, and further suggestions: (text)

2013-11-13 X: A bit more course material on different data sources like WordNet and other corpora.

2013-11-13 X: I don't know.

Oppsummering av innspill: (Her kommer oppsummering fra studentevalueringen.)

En student foreslo å bruke mer litteratur i kurset. Jeg er enig med dette, det kunne vært forbedret.

Ev. underveistiltak:

/

Faglærers samlede vurdering, inkl. forslag til forbedringstiltak:

Jeg er veldig fornøyd med kursets forløp. Det var gøy å arbeide sammen med studenter som er veldig engasjerte og hardtarbeidende. På begynnelsen av semesteret hadde to av studentene ingen erfaring med programmering. Det er grunnen til at studentene ble gitt et kræsjkurs i programmering. Det var imponerende å se de ferdige prosjektene. Resultatene var fascinerende.
