Re: CHEMISTRY EUROLABEL® Award Letter

Dear Professor Mjøs,

I am pleased to inform you that the Administrative Council of the European Chemistry Thematic Network Association has decided to re-award the **CHEMISTRY EUROBACHELOR®** Label to the University of Bergen for the programme

***Bachelor I naturvitenskap, Studieprogram: Kjemi
BSc, Study Programme: Bachelor's Programme in Chemistry***

I enclose the Certificate. Congratulations!

No **conditions** were issued by the Label Committee.

The Label Committee expresses this **recommendation**:

Presentation of the **EUROBACHELOR®** logo and link to **EUROLABEL®** web page (<http://ectn.eu/committees/label/>) on the web page of Bachelor's Programme in Chemistry.

The number of ECTS credits of the Bachelor thesis may be harmonized with other courses of Bergen University (10 ECTS) by moving some of the learning outcomes from KJEM298 to KJEM290 in order to create two courses of 10 credits. The bachelor project would then be focused on the experimental work and the thesis, while all the preparation for the project would be in KJEM290.

Please note that any major changes made in the degree programme should be notified to this Committee.

Best wishes

Reiner Salzer

Chair, ECTN Label Committee
