Sammendrag av studentene sin evaluering / Summarize the results from the student evaluation

Student evaluation:

- Partner companies presented thesis possibilities too late, which delayed the progress
- Some information was presented too late for students to prepare well
- Facilitation of class group dynamics may be improved
- Students would have preferred more physical classes (and less online teaching)
- Study plan should have been made more detailed

Emneansvarligs evaluering / The course coordinator's evaluation

Teacher evaluation:

- The course delivered a range of relevant activities (lectures, guest lectures, master thesis pitches, student presentations, participation at a relevant conference)

Points of improvement:

- Partner companies must be contacted earlier (e.g. 6 months before the pitch)
- Details of course information should be published at course web page earlier
- If possible, more physical classes
- If possible, activate the calendar in the course web page (currently not possible, technical issues with mitt.uib.no, e.g. https://mitt.uib.no/calendar#view_name=month&view_start=2021-02-01)

Evt. kommentar til karakterfordeling / Comments on the grade distribution

2021: All 8 students passed the course.

All students delivered a project planning report for the master thesis starting fall 2021.

7 of 8 students have supervisor for this master thesis.

Mål for neste evalueringsperiode - forbedringstiltak? / Goals for the next evaluation period - what can be improved?

- there should be a course evaluation halfway in the course
 - number of students who answer evaluation should be raised
 - student score for course should be improved
-
